Software Engineer | Ruby on Rails | Elixir
Guarapuava, Paraná, Brasil

Resumo

I'm a Software Developer with experience in a variety of technology stacks involving Ruby on Rails, my specialty being a back-end developer with a focus on architecture, performance, and tests. My past experiences allowed me to have a lot of exposure to projects with queues, microservices, and different types of Architecture structures, such as DDD and Event-driven Architecture, and going from the traditional Rails Monolith architecture to well-built microservices. Between various projects, I have developed good communication skills and other soft skills with the product owner, stakeholders, and technical team as well, building a lot of confidence to help other colleagues to improve thought pair programming, sharing knowledge and tips in our daily work and sometimes through internal projects like brown bags and Book clubs.

Apart from my professional experience, I'm an avid and active learner always finding new stuff and trying to learn new technologies that interest me, and always open to learn and develop skills.

Experiência

Vindi

Senior Software Engineer
março de 2023 - março de 2024 (1 ano 1 mês)
São Paulo, Brazil

Meta

Senior Software Engineer
junho de 2022 - janeiro de 2023 (8 meses)
Brazil

Contract Back-end Developer at James Delivery: worked with microservices and almost exclusively handling queues and improving the architecture to integrate the stakeholders' supermarket franchise into the delivery app.

Contract Back-end Developer at Youse Seguradora - Insurance Company:
improving the code performance and design, enhancing the user experience
through bug-hunting queue events in microservices communications, and
proposing root causes solutions.

enjoei

Software Engineer

março de 2021 - junho de 2022 (1 ano 4 meses)

Brazil

I acted as a Software Engineer and Architect using Ruby on Rails and Golang, helping multiple teams by building frameworks and standards to improve the design and productivity of the company microservices, and also in the continuous improvement of the monolith in Ruby on Rails, making processes that aim to help the daily work and success goal of developers and engineers.

Codeminer42

2 anos

Software Developer

agosto de 2019 - fevereiro de 2021 (1 ano 7 meses)

Guarapuava e Região, Brasil

Worked as a Software Developer, mainly with Ruby and Ruby on Rails.

Intern

março de 2019 - julho de 2019 (5 meses)

Guarapuava e Região, Brasil

During the internship program, I worked on internal projects such as Punchclock, a web app to manage our team's time punches, using Ruby on Rails.

Agrosmart

Back-End Developer by Codeminer42

outubro de 2020 - janeiro de 2021 (4 meses)

Development of a Public Data Warehouse(PDW), to be used by Agrosmart product team automating web scrape of soil, weather and climate data available from different public agencies from different countries.

The objective of the PDW is to:

- automate data extraction from these different sources, via data scraping or even through existent APIs;
- store data as a standard georeferenced time series;

- allow Agrosmart team or other Agrosmart systems to pull data through a private API.

Tech Stack: Ruby on Rails, PostGIS with usage of Rasters and geospatial search, Domain-Driven Design, Background Jobs with Shoryuken gem integrated with Amazon SQS.

StarsPremium

Back-End Developer by Codeminer42

setembro de 2020 - setembro de 2020 (1 mês)

A Short contract to add a new feature, improve functionalities performance and specs coverage.

Tech Stack: Ruby on Rails, Elastic Search, Docker and RSpec.

SHS Health Tech

Back-End Developer by Codeminer42

abril de 2020 - agosto de 2020 (5 meses)

Create from scratch an Admin Dashboard with the functionality to generate saving based of information about Brazilian Hospitals supplies previously purchased, matching new purchases with partner suppliers on the platform.

Tech Stack: Ruby on Rails, JavaScript, Heroku with CI/CD and complex queries using ActiveRecord.

Seven Days Vip

Back-End Developer by Codeminer42

novembro de 2019 - dezembro de 2019 (2 meses)

Integrate their landing page build on Wordpress to a Rails Admin we created as a Back Office Admin.

Tech stack: Wordpress, PHP, Rails API and Heroku with CI/CD.

OmniTrade

Back-End Developer by Codeminer42

setembro de 2019 - setembro de 2019 (1 mês)

Development of new features, refactors and Improvements on Codeminer42's Cryptocurrency exchange.

Tech Stack: Ruby on Rails, Redis, RabbitMQ, Crypto Currencies, Daemon and Docker

ESL Sistemas

Back-End Developer by Codeminer42

agosto de 2019 - setembro de 2019 (2 meses)

Guarapuava Area, Brazil

Development of a logistics microservice API applying a Genetic Algorithm approach to the Traveling Salesman Problem.

Tech Stack: Ruby on Rails, Crystal Lang, Amazon Lambda
