JAVA - Ganhando Produtividade no Java com Spring Framework

JAVA - Ganhando Produtividade com Stream API

React Completo

Gabriel Santos

FullStack Developer | PHP | Symfony | Java

Minas Gerais, Brazil

Summary

I'm a full stack software developer, I develop web applications using PHP and now starting with Java. I have experience in Symfony/PHP in both old and recent versions, I have knowledge and a strong interest in Java and Python.

What I've already done:

- I have already optimized parts of an ERP system used on a national scope, improving aspects of performance, security and usability.
- I have worked on investigating problems, identifying causes, effects and presenting possible solutions.
- I have already monitored hosting servers (Linux), observing the behavior of applications, analyzing possible bottlenecks and preparing stability reports.
- I have already needed to extract data manually (SQL) in specific demands, where there was no implementation of the process in the application.
- Documented processes, speeding up future re-executions.

I consider the communication factor to be a key element in the composition of a professional's profile. I value assertive communication, giving preference to a relaxed form of interaction. I am always willing to learn new things and appreciate environments that encourage continuous learning.

Experience

DFranquias

Full Stack Developer

December 2021 - Present (2 years 7 months)

Brazil

I work in full stack development, maintaining an ERP in the education field.

- Software development (PHP, Symfony, Mysql, Linux):
 - REST API development;
 - Monolith maintenance;
 - Software maintenance (ERP legacy), evolving bug fixes and creation of new features;
 - Process documentation;
 - Preparation of reports based on manual data extraction in the database (Mysql).
-
- Hosting server administration (Linux):
 - Crontab definition rules;
 - Performance/resource consumption analysis;
 - Creation of scripts for process automation.

I also collaborate in the development of new products.

Education

Instituto Federal de Educação, Ciência e Tecnologia de Minas Gerais - IFMG

Bacharelado em Sistemas de Informação, Tecnologia da Informação · (February 2018 - December 2021)
