Eduardo Lopes

Mobile Software Engineer | React Native
São Paulo, São Paulo, Brazil

Experience

Hinge Health

Senior Software Engineer

September 2022 - Present (1 year 8 months)

Brasil

Member of the Mobile Platform team.

- Spearheaded the implementation of deep links in the React Native app, boosting user engagement and expanding the user base.
- Collaborated in a cross-functional team to redesign the app's architecture, enhancing maintainability and scalability through effective modularization.
- Led the development and rollout of 'HH-CLI,' a custom command-line interface tool, designed to improve developer workflows and enforce coding standards. This tool facilitated module scaffolding, automated testing setups, and served as a learning platform to align developers with organizational conventions.

Creditas

2 years 11 months

Senior Software Engineer

September 2021 - September 2022 (1 year 1 month)

São Paulo, São Paulo, Brasil

As a member of the Mobile Platform Team, I played a key role in building the team from the ground up. This included understanding the team's capabilities and limitations, identifying root cause problems on the platform, and determining the best approaches for addressing them.

I also played a key role in creating a testing architecture that transformed our approach to testing from a simple tool to a comprehensive set of quality tools designed to minimize the occurrence of bugs in production.

In addition, I led the effort to redesign the App's modular architecture to improve development scalability. Finally, I presented on Tech Forums within the company, sharing the solutions implemented by the platform team on the mobile tribe.

Software Engineer

November 2019 - September 2021 (1 year 11 months)

São Paulo e Região, Brasil

Acting on developing Credits Mobile Application using React Native, Node.JS and GraphQL.
