About Me

I am a backend developer with nearly **2 years** of professional experience in **C#, ASP.net, .NET Core, Microservices, SQL, WebSockets, Docker, MongoDB, Swagger, JIRA, Confluence, Bitbucket, and Git/Gitflow**. I am seeking new opportunities to enhance my technical skills, learning new languages and tools, such as Java, Python, AWS, Kafka. I am also studying to obtain the AWS Cloud Practitioner certification.

Graduation

- Bachelor's Degree in Systems Analysis and Development - Uniasselvi- 2019
- Bachelor's Degree in Computer Science – Estacio - 2024

Languages

- Portuguese (Native)
- English (Intermediate)

Professional Experience

[Systems Analyst | Backend Developer]

Ecocentauro Sistemas 📅 **2019/01 – Current**

- Manual system testing on demand
- Analysis and mapping of system functionalities
- Validation and quality control
- Performance and failure check
- Training of system modules on site with the customer
- Development of Crystal and Fastreport reports based on Firebird and Postgres databases
- I frequently work with relational databases (**SQL Server**) and am responsible for creating queries, improving the performance of other queries, creating procedures, functions, mapping new tables, etc.
- Developed desktop applications in C# integrating with SQL Server, Mysql, Postgres and Firebird databases.
