Technical High School, specialization in Desktop Applications: Colégio Estadual Brigadeiro Schorcht - Rio de Janeiro, RJ, Feb. 2001 - Dec 2004

PROFESSIONAL EXPERIENCE

Microsoft - Developer Advocate II JavaScript/Node.js & TypeScript | Dec 2019 - actual

Belonging to the JavaScript/Node.js in Azure Cloud Advocacy Team with focus primarily on the overall experience of JavaScript developers in Azure.

- **Mission**

To improve the quality of our JavaScript service offerings in Microsoft's Cloud offerings through direct product feedback, Community engagement, and content that is intentionally aligned with our cloud growth strategy.

- **Responsibilities**

Create and share diverse content and demonstrations spanning beginner to advanced levels for developing, deploying, managing, and scaling Azure applications. Promote Azure products and services actively in local communities through various channels. Establish connections with prominent local developer leaders, gaining their trust in Microsoft technologies. Cultivate relationships with influencers, nurture a thriving technical community, and prioritize and communicate product feedback and technical issues with engineering. Contribute to open-source projects and create impactful applications to engage and win over developers. Utilize data, experiments, and customer feedback to foster community growth and relay valuable insights to the Product Team.

Microsoft - Regional Cloud Advocate in Latin America | Mar 2019 – Dec 2019

- **Mission:**

The mission of the Cloud Advocacy team is to win the hearts and minds of Developers through authenticity, community, and technical engagement. The Cloud Advocacy team is first and foremost pivoted on enabling a healthy ecosystem for technical communities to create and build things in the cloud.

- **Responsibilities:**

Create and share diverse content and demonstrations spanning beginner to advanced levels for developing, deploying, managing, and scaling Azure applications. Promote Azure products and services actively in local communities through various channels. Establish connections with prominent local developer leaders, gaining their trust in Microsoft technologies. Cultivate relationships with influencers, nurture a thriving technical community, and prioritize and communicate product feedback and technical issues with engineering. Contribute to open-source projects and create impactful applications to engage and win over developers. Utilize data, experiments, and customer feedback to foster community growth and relay valuable insights to the Product Team.

HACKDEV - Software Developer (Self Employee) | Apr 2016 – March 2019 (3y)
