adryann312@gmail.com

Full-Stack Developer with a demonstrated history of delivering high-quality web applications. Proven expertise in collaborative teamwork, emphasizing maintainability and prioritizing the end-user experience. Skilled in leading cross-functional teams and successfully managing projects from inception to completion. Adept at designing scalable and maintainable systems that align with business objectives.

EXPERIENCE

Fullstack Developer

Aug 2022 - Present

Ubistart

- Spearheaded diverse projects leveraging a wide array of technologies including Laravel, Node.js, Nest.js, React, Vue.js, Next.js, among others, to innovate solutions and create cutting-edge features.
- Fostered seamless collaboration across cross-functional teams, proactively identifying and resolving technical hurdles to drive project success.
- Played a pivotal role in shaping technical specifications and architectural designs, ensuring alignment with project objectives and scalability requirements.
- Actively engaged in Agile development methodologies, contributing to Scrum team meetings and iterative planning sessions to streamline project workflows and enhance productivity.
- Championed the implementation and maintenance of robust automated testing and deployment processes, enhancing efficiency and minimizing downtime.
- Maintained unwavering commitment to product quality, conducting rigorous testing protocols and bug-fixing initiatives to deliver exceptional end-user experiences.
- Led initiatives to optimize product quality assurance, developing and implementing innovative testing methodologies, tracking key performance indicators, and fostering seamless integration processes across development teams.

Fullstack Developer

Sep 2021 - Aug 2022

Openness Technology

- Conceptualized, designed, and executed innovative features including graphic reports, PDF and XML integration, and budgeting functionalities, enhancing product functionality and user experience.
- Investigated and resolved bugs in existing features, conducting thorough testing and incorporating customer feedback to ensure optimal performance and usability.
- Pioneered the implementation of automated testing frameworks for previously untested legacy features, improving code reliability and minimizing potential regressions.

Fullstack Developer

Jan 2020 - Sep 2021

KURZ

- Orchestrated the development of backend systems, meticulously crafting robust APIs and databases using Node.js, JavaScript, and Postgres. This ensured efficient data management and seamless communication between the server and client applications.
- Attained a remarkable milestone of 100% test coverage through the implementation of rigorous unit and integration tests. This commitment to quality assurance bolstered the reliability and resilience of the codebase, minimizing the risk of errors and enhancing overall product stability.
- Comprehensively documented the backend codebase, meticulously detailing API endpoints, and meticulously outlining database schemas. This documentation served

as a valuable resource for future reference, facilitating seamless onboarding for new team members and enabling efficient troubleshooting and maintenance.

- Fostered close collaboration with the frontend development team, actively participating in API integration efforts and providing invaluable support in implementing complex business logic on the client side. This collaborative approach ensured the cohesion and synchronicity of frontend and backend functionalities, resulting in a cohesive and seamless user experience.

Fullstack Developer

Jan 2019 - Jan 2020

Capri

- Crafted captivating and responsive landing pages, leveraging HTML, CSS, and JavaScript to create visually stunning interfaces that captivated users and optimized engagement across devices and platforms.
- Engineered sophisticated web scraping bots utilizing JavaScript and cutting-edge technologies, enabling the automated extraction and analysis of data from diverse online sources. This streamlined data collection processes and empowered data-driven decision-making across projects.
- Seamlessly integrated third-party APIs into web applications, enriching functionality and extending features for end-users. By leveraging external APIs, applications were equipped with enhanced capabilities, driving user satisfaction and enriching the overall user experience.

SKILLS

Intermediate in: Node, Javascript, Typescript, React, Vue, Nest, Next, Laravel, Php, AWS, Docker, Linux, Git, Postgres, Mysql, MongoDB, Redis, RabbitMQ

LICENSES & CERTIFICATIONS

Cloud Practitioner

2023

Amazon Web Services
