ABOUT

2.5 years of professional experience with React Native, Javascript e TypeScript. I've already participated in some projects where I've created screens, implemented new features, implement sdks ios and android ,improved processes and apps from scratch to publication in the stores (Play Store and App Store).I write technical articles in the dev.to: [Profile Link](#)

EXPERIENCES

Gbx Brasil - *Middle React Native Developer (october/2023 - march/2024)*

- I was responsible for creating screens according to **Figma**, connecting with backend and use of **Postman** and **swagger**. I've reduced the time it takes to update apps in the **Play Store** and **App Store** by 60% with the implementation of **Fastlane**. Responsible for creating and configuring stores and correcting when negative feedback prevented publication Technologies **React Native**, **TypeScript**, **GitHub**, **REST API** and **Fastlane**.

Project Freelancer InfiniteDev - *Middle React Native Developer (july/2023 - september/2023)*

- App Rightee, Responsible for implementing **mixPanel**, a tool responsible for tracking actions and helping the client to better understand the behavior of its users. Technologies: **React Native**, **Javascript**, **Github**, **nodeJS**, **ReactJS**.

Inmetrics - *Junior React Native Developer (february/2023 - may/2023) -*

- E-commerce app for a supermarket chain. I was responsible for improving the app performance using **hooks**, **React Query** and **Flipper** to understand the points of improvement. This allowed the app to run again on older phones. Technologies: **React Native**, **React Query**, **Redux**, **BitBucket**, **TypeScript** e **JavaScript**.

Atman Systems - *Junior React Native Developer - (january/2022 - february/2023)*

- Traffic signal management app, responsible for implementing new features, componentization, tasks through **Jira**, **Code Review** e **GitFlow**. Technologies: **React Native**, **Expo**, **Typescript**, **GitHub**.

EDUCATION

Systems Analysis and Development Technologist - *Descomplica - JAN 2022 - JAN 2025*

OTHER TECHNOLOGIES / PROJECTS

Native IOS - Swift (UIKit and Swift UI), mvvm, mvc

Back-end - nodeJs, typescript, fastify, swagger and fastify
