Summary

I am continuously developing my skills in software development and architecture. I'm proactive, results-oriented and focused on productivity and quality.

I'm a team player and enjoy exchanging knowledge and experience, which I believe is a great source for personal and professional growth. I'm constantly studying to improve my skills in design patterns, new frameworks and languages, architecture and DevOps.

I also like taking on and solving challenges.

Experience

Senior Software Engineer .Net

ESX

Jan 2022 - Present (3 months +)

.NET Developer

ESX

Sep 2020 - Jan 2022 (1 year 5 months)

Development of Solutions for Companies in the Fleet Management Segment

Technologies used daily:

- Asp.net Core
- Unity Test used XUnit/NUnit
- Relational DataBase: SQL SERVER
- DB NoSQL: MONGO
- Micro-ORM: Dapper
- AZURE (Azure Functions, Service Bus, WebJobs)
- Repository: GitLab
- VSTS

.NET Developer

Joit Solutions

Nov 2018 - Sep 2020 (1 year 11 months)

Focused on developing and patching all client applications

Conveyor, across the entire range of transport. I act as a technical key piece,

Windows Services development, APIs, Web systems, and database development

Dice. I am currently working with .Net Framework and .Net Core as the main

programming languages to develop applications, Cloud performances, Data, Security,

MVC, applying the SOLID standard

Evolutionary and corrective maintenance of the customers' systems in general.

- Integrations between systems through Rest APIs
- Development of new projects from their conception to implementation in production
- Meeting with clients with the business team to understand the scope and survey/planning of activities developed.
