Intermediate

Experience

Founder & Lead Developer - Nuxt.js & Adonis.js

Encantômetro CX - From March 2024 to present

Remaking the Encantometer project using
TypeScript. Allowing scalability and support of
a software as a service with a B2B model.

Junior Front End Developer - React Native, Angular, React.js & React Testing Library

Scaleup - From October 2022 to January 2024

Bug resolution and creation of new features &
flows in the company's main app using React
Native, according to the UI Design on Figma.

Also acted on the company's main web project
firstly using Angular then migrated to React.
From design system to implementation of new
features, screen flows, communication with
REST API's & data manipulation using queries.

Full Stack Developer - Vue.js, TypeScript, Nuxt.js & Adonis.js

From April 2021 to September 2021

Attended an online bootcamp, developing in 6
months 9 Full Stack projects. Using Vue.js, Sass
and Nuxt.js on front end. Along with JavaScript,
TypeScript & Adonis.js on back end and API's.

UI Designer - Adobe XD & Figma

From May 2021 to April 2022

I reproduced, developed & redesigned apps,
forms, e-commerce, and landing pages from
scratch. To fictitious brands or products.
