SKILLS

Programming Languages JavaScript | TypeScript | Go | Python
Technologies React.js | Next.js | Node | AWS | HTML/CSS | Cypress

EXPERIENCE

SAP

Feb 2022 - Present

Mid-level Software Engineer

São Leopoldo, RS - Brazil

- Worked on a project to provide a platform to help the SAP Concur support team. I used React(Next.js) and Golang to create the UI and backend for frontend.
- Contributed to the SAP Concur project, creating a new solution for Concur's data control. In this experience, I used Go as the main language, and AWS as the cloud infrastructure (Lambda functions, EC2, S3, SQS).

TAG - Experiências Literárias

Apr 2019 - Feb 2022

Mid-level Software Engineer

Porto Alegre, RS - Brazil

- Worked with the web applications team as a full-time Engineer, serving as the technical reference for our specialized frontend team.
- Specialized in performance-based web development using React (next.js/gatsby), Django (Python), and Node microservices with AWS tools including Lambda functions and SQS.
- Implemented Google Marketing Tools such as Google Analytics, Google Optimize, and Google Tag Manager during this tenure.

Software Engineer Intern

- Focused on TAG's web applications, utilizing React, Node, and Python (Django) as the main frameworks in the project.

NOTABLE PROJECTS

FullStack Training - Alura (Online Courses)

Jun 2022 - Apr 2023

Software Development Instructor

São Paulo, SP - Brazil

- During my time as a freelance instructor at Alura, I achieved one of my most significant career goals: sharing knowledge and aiding new developers in enhancing their skills. I created and delivered software development courses at Brazil's premier online tech school.
- Topics Covered: - React.js (Creating your first webpage with React) - Node.js (Creating your first API) This experience allowed me to contribute to the growth of new developers, fostering a community of learning. My skills encompass JavaScript and Front-End Development.
