EXPERIENCE

Wiley, Curitiba PR, BR — Senior Fullstack Software Developer - Java

MAR 2024 - PRESENT

ipsum

Main tech: React, Java, Spring, MySQL, PostgreSQL, Kafka, TIBCO, Liquibase, Kibana, Dynatrace, Docker and AWS.

Ibratan, Joinville SC, BR — Backend Software Developer - Java

JAN 2022 - FEB 2024

Work together with business to design and implement new products for affiliate financial partners.

Designed performative application and solutions capable of receiving a large amount of data and requests simultaneously.

Restructured legacy policies from scratch to increase its availability, better to maintain and follow conventions, clean code and design patterns.

Main tech: Java, Spring Boot, Quarkus, Mysql, MongoDB, DynamoDB, Kafka, Kubernetes, Grafana, Docker and AWS.

Kyros, Uberlandia MG, BR — Backend Software Developer - Java

DEC 2020 - JAN 2022

Mentor trainees developers.

Gained confidence to restructure and migrate customer software applications into a new architecture using Cloud.

Work together with different clients to understand their needs and design tech solutions.

Main tech: Java, Spring Boot, Oracle, PostgreSQL, Kafka, Kubernetes, Hibrnate, AWS

SKILLS

Good experience with a wide range of tools including:

Java, Spring Boot, Spring Security, AWS, MySQL, PostgreSQL, MongoDB, DynamoDB, Kafka, React, Angular

I've applied these skills in multiple large distributed systems used by companies around South America.

HIGHLIGHTS

Actively Designed new software solutions capable of receiving a **large amount of data and requests simultaneously**

Restructured and migrated software applications into a new **hexagonal architecture** into the Cloud giving more **Availability, Scalability**

As main developer I **Designed** an entire **POS lib** to be used around **Brazil**, receiving **more than half million requests per minute** with a **low rate of bugs**.

Conducted code reviews with the aim of maintaining **good practices, clean code** and following the **team conventions**

Luizalabs, Franca SP, BR — Outsourcing Full Stack Software Developer

AUG 2019 - DEC 2020

Designed and built a POS application to receive over half million os requests simultaneously from over 1000 tenants in Brazil

Lead, guide and coach a team with 4 developers.

Work along with other teams to understand their necessities and how our squad segment could help them.

Main tech: **Java, Spring Boot, Hibernate, NodeJs, Typescript, Mysql, PostgreSQL, Oracle, Grafana.**

LANGUAGES

Portuguese, English

ERnetwork, Franca SP, BR — Full Stack Software Developer

FEB 2019 - DEC 2020

Develop and integrate new features for hybris ecommerce platform.

Participated in the design process and architecturing software applications.

Main tech: **Java, Spring Boot, Hibernate, Oracle, Mysql, PostgreSQL.**

EDUCATION

Uninter University Center — Bachelor of Software Engineer

JAN 2022 - DEC 2025

ETEC Dr. Júlio Cardoso — Developer Associate Degree

JAN 2016 - DEC 2018
