## Summary

Graduated in Information Systems, with significant banking experience, helping to build a bank institution from nothing, I've been working professionally with Android development for almost 5 years, and more than 2 as a tech leader. With easy communication, I consider myself a curious person who does his best to help grow everyone close to me.

## Experience

### Technical Lead - Remote

Stone

Apr 2022 - Present (1 year 2 months)

#### • Responsibilities

In this challenge I'm in charge of a mutiplatform team (Android, IOS and WEB), who develop the following features:

- Receivables: feature where the user can track receipts for all their sales.
- Bank domicile: feature where the user can select where receive the values of their sales.

As a experienced developer, I'm working to help others developers to reach out a new level in their careers. Producing internal content, making 1:1 conversations.

#### • Impacts

We are reducing operating cost of the company, delivering better experience to use, avoiding the customer direct contact. Until now, we have 50% less contacts about the subject "change account domicile" in the last 9 months.

### Android Tech Lead - Remote

Stone

Jul 2021 - Jun 2022 (1 year)

#### • Responsibilities

As a team leader, I was responsible for a team of 6 developers, following their personal and professional development. In addition, I made the bridge between developers and demands of product team, stipulating deadlines, creating and validanting tasks, correcting bugs, and developing when needed. Futhermore, participated of the release process of new versions of Android app on Google Play Store.

In charge of following features

- Prepay credit card emission
- Account registration
- KYC - Identity checks
- Salary portability
- Profile Information

- Payment invoices - creation and payment.
- Prepay - feature that anticipate to our customers values from their sells.

- Impact

- Released a new refactored version of one of biggest profitable product of the company, Prepay.
- Released the prepaid card product.
- Helped to build first BFF for the prepay card product.
