## PROFISSIONAL PROFILE

I am a very dedicated person who always wants to demonstrate my best by delivering the maximum possible results. I am communicative, I like to talk and understand everything I am doing. I am self-taught and I am always improving myself by reading books and studying hard to achieve my goals. I am always available to help because I really enjoy interacting with people and helping in any way I can.

## WORK EXPERIENCE

### Front end developer

Freelance

06/2018 – 01/2019

- 10 Worked as a freelancer on various small projects, gaining extensive knowledge in JavaScript.
- 10 Acquired proficiency in Redux, Flux, and Context API.
- 10 Developed landing pages and simple apps using Android.
- 10 Created full-stack e-commerce websites and other projects utilizing React.js, Node.js, MongoDB, and Redux.

### Olivia

Front end - React

Achievements:

- ⑩ How to master aws amplify using react native and all of it's features
- ⑩ I learned more about react performance working with long lists, also working with GraphQL because he saves data in queries and don't need to update when there's no change in some list
- ⑩ I learned how to plan, architect and create a project from scratch I learned how to make a budget for a client of such big project
- ⑩ On this app, you can register and login with email or using google and facebook authentication
- ⑩ You can create services, find services, search for users, create your own portfolio, users can detail more about their profile, location, users can edit/create/delete/read services, portfolios. Also, users can chat with real time, send images and pdfs, and a lot of awesome animations like drag and drop, svg, download pdfs and export pdfs.

## YEARS OF EXPERIENCE

- React Native: 6 years
- Jest/ Unit Test: 4 years
- Redux: 5 years
- Typescript: 4 years
- Javascript: 6 years
- React.js: 6 years
- Node.js: 5 years
- Express: 5 years
-

- MongoDB: 5 years
- GraphQL: 4 years
- Git / Github: 5 years
- Next.js: 4 years
- AWS: 4 years
- AWS Amplify: 2 years
