## PROFESSIONAL OVERVIEW

Data Analyst with 3+ years of expertise handling datasets and collaborating across teams to derive data-driven insights. Proficient in creating visually compelling data visualizations to communicate complex findings effectively. Skilled in data analysis using statistical methods to identify patterns and extract meaningful insights. Experienced in executing data wrangling tasks and developing efficient ETL processes for data extraction.

## TECHNICAL SKILLS

**Languages:** Python (4 years) | SQL (3 years) | PySpark (2.6 years) | R (1 year)

**Technologies:** Jupyter Notebook | Databricks | Airflow | Tableau | Git

## EMPLOYMENT & EXPERIENCE

### Data Analyst (Remote)

May 2021 – October 2023

iFood - Company focused on incorporating and developing innovative solutions for food delivery.

- Collaborated closely with the business area, translating their needs into actionable insights and leveraging data-driven strategies to enhance decision-making processes, resulting in more informed and strategic decisions.
- Engineered visually appealing and insightful data visualizations, transforming complex datasets into easily digestible formats, facilitating a deeper understanding of key trends, and driving better-informed business decisions.
- Implemented ETL and data organization processes, ensuring data cleanliness and accuracy. This approach significantly improved the Logistics team's workflow by providing a centralized and reliable data table, improving data integrity, and speeding up analytical queries for faster and more efficient analysis.
- Worked collaboratively with cross-functional teams, ensuring alignment between technical solutions and business requirements, fostering a cohesive and integrated approach to data-driven decisions.

Tech stack: PySpark | SQL | Databricks | Airflow | Tableau | Git | Scrum

### Data Analyst (São Paulo)

April 2019 – October 2019

Vitrio - Marketing agency focused on digital.

- Automated data extraction, ensuring an efficient process and executed data manipulation tasks using R, enhancing the quality and relevance of the extracted data.

Tech stack: R | SQL | BigQuery

### Data Intern (São Paulo)

April 2018 – October 2018

Accenture - Consulting firm in strategy, digital, technology, and operations services.

- Proactively observed the data modeling work, learning and contributing to the development of ETL in R and SQL.

Tech stack: R | Python | SQL
