Senac, 2023 - 2023  
Postgraduate Degree  
Information Technology Management and  
Governance

Universidade Paulista, 2017 - 2021  
BTech  
System Analysis Development

Faculdade Santa Lúcia, 2017 - 2021  
Bachelor's degree  
Industrial Engineering

## PROFESSIONAL SUMMARY

I'm a dedicated software engineer with a strong passion for JavaScript and continual self-improvement. Currently, I'm collaborating with an Australian startup to develop The World's 1st M&A Marketplace, revolutionizing the industry. Previously, I contributed significantly at IBM, developing a crucial dashboard for monitoring machines globally. At Dock, a prominent Brazilian fintech company, I played a key role in building a comprehensive application from scratch. I thrive in AGILE environments and enjoy collaborative, fast-paced settings. My skills span various languages and technologies, enabling me to adapt to different projects and contribute effectively to software development. I'm proficient in front-end frameworks, databases, deployment processes, and version control systems. Additionally, I excel in problem-solving and communication within teams.

## SKILLS

React  
Vue  
Node.js  
Typescript  
GraphQL  
SQL  
GitHub  
Agile Methodology

## EXPERIENCE

Frontend Engineer, io.insure, Australia  
Jun 2022 - Current

- Worked across all company products, ensuring consistent and efficient development practices throughout the organization.
- Actively engage in Agile methodologies to ensure effective project management and team collaboration.
- Promptly address potential bugs upon identification to ensure product reliability and enhance user satisfaction.
- Develop unit tests using Jest and Testing Library to ensure the reliability and robustness of the codebase.
- Create Storybooks to accompany the design system, ensuring consistent and visually cohesive UI components across the application.

Skills: Vue.js, JavaScript, Vuetify, Vuex, Pinia, Jest, Testing Library, Storybooks, Front-End Development, Agile Methodologies, GitHub, Gitlab.

## LANGUAGES

Portuguese - Native  
English - Advanced

**Full Stack Engineer, Dock, Brazil**

Dec 2021 - Jun 2022

- Designed and implemented the company's core application using a Microservices architecture, encompassing both the Backend and Frontend.
- Collaborated within an Agile environment to facilitate efficient team deliveries.
- Worked closely with the QA team to identify and address bugs discovered during sprint cycles.
- Provided mentorship and guidance to interns and junior developers to foster skill development and team cohesion.

**Skills:** React.js, Node.js, TypeScript, Redux, Context API, GraphQL, Apollo Client, Jest, PostgreSQL, Microservices, Amazon Web Services (AWS), Redis, SCSS, Storybooks, Kafka Streams, JSON Web Token (JWT), Objection.js, Knex.js, Agile Methodologies, GitHub.

**Full Stack Developer, IBM, Brazil**

Jun 2019 - Dec 2021

- Developed a dashboard to facilitate IBM's monitoring of clients' machine health.
- Created automation scripts, streamlining processes and improving efficiency.
- Created unit tests to ensure code reliability and maintainability.
- Worked within an Agile environment to adapt to changing requirements and deliver high-quality solutions.
- Provided ongoing support and development for company applications, resolving specific issues and improving user experience.

**Skills:** React.js, Node.js, TypeScript, Redux, Jest, SQL, Sequelize.js, Python, OpenShift, Agile Methodologies, GitHub.
