Summary

As a Data Analyst, I work on developing and improving data products focused on Finance, Controllershship, Accounting and FP&A. I coordinate data projects and implement a data driven culture in organizations, ranging from understanding the business problem, data modeling, architecture definition, ETL, and DataViz.

I have +5 years of experience with data and business, working with SAP BI modules such as BW, BO, HANA and ECC, as well as Microsoft Power Platform, Fabric, Databricks, Python, SQL and Power BI. I have also contributed to the implementation and development of data architectures like data-mesh and virtual data models (VMD) on SAP Datasphere. I am passionate about using data to solve business challenges and create value.

Experience

Mid Data Analyst

Vale

Feb 2023 - Present (1 year 5 months)

- Coordination in the implementation and development of data architectures like data-mesh
- Development of complex queries by T-SQL
- Development and maintenance of large and complex datasets used by business areas.
- Development of virtual data models (VMD) on SAP Datasphere for finance areas such as FP&A, TAX and Controllershship

Data Analyst

Vale

Aug 2020 - Feb 2023 (2 years 7 months)

- Development of high impact dynamic and static dashboards in power bi
- Development of complex measures in DAX.
- Building complex architectures using data flows from the Power BI
- Development and maintenance of large and complex datasets used by business areas.
- Modeling semantic models with SQL using SAP HANA to create data cubes.
- Data management and governance aimed at implementing a data driven culture in organizations.
- Development of low code solutions with Power Apps and Power Automate.

IT Intern

Vale

Aug 2018 - Jul 2020 (2 years)

As an intern at Vale, I worked on the governance and management of the company's main production control system (Vale Production Management - Mining). We had a duty to ensure the standardization of concepts and processes, in addition to making data available through KPIs, in an accessible and

reliable way for the entire company. We were also responsible for all data automation, as well as optimizing reports and creating dashboards in Power BI.
