Curitiba/PR

joseilton.correia@gmail.com - (41) 9 9256-1975

48 years, Brazilian, married.

SUMMARY

IT professional with more than 20 years of experience in the Quality Assurance area, having already worked with manual tests and test management with a focus on planning, execution support, development, and schedule control, preparation of user manuals, application of training, registration, and notes of non-compliance, in addition to the management and allocation of teams. In the last 3 years, I have been working as a QA Engineer doing test automation using Robot Framework and Cypress.

ACADEMIC FORMATION

Tecnologia em Gestão da Informação para o Setor Financeiro - **Universidade Bandeirante UNIBAN** – 2008.

LANGUAGES

English: advanced

PROFISSIONAL EXPERIENCE

Xogito.

Test Automation Engineer – 05/2021 until now

- Structuring the QA area with process documentation in Confluence
- Automation of Regression and Sanity tests
- Automation of API tests using Robot
- Automation of Android mobile tests using Robot + Appium
- Progression of effort for test automation
- Preparation of progress reports for automation activities
- Automation of WEB application using Cypress, Playwright e Typescript
- Pipeline creation for CI/CD in GitHub Actions and Azure using the YAML file
- Test case creation in the Zephyr and TestLink

Volvo.

Test Manager – 06/2019 to 05/2021

- Test Plan creation;
- Elaboration of the project team allocation schedule, as they are usually cross-area projects with different priorities and allocation times;
- Kickoff meeting to inform the team of the prepared plan;
- Daily meetings to pass the project status;
- Automation of test cases using Robot Framework in WEB environment with Selenium, Mainframe and SAP;
- Estimation of effort to create automation scripts;
- Integration between Robot Framework and Azure platform;
- Automation of API test cases with Robot Framework
- Automation of a web application using Cypress

DXC Technology.

QA Team Lead – 07/2018 to 06/2019

- Responsible for planning team activities in different projects;
- Responsible for the management and allocation of the team, in order to control billing;
- Responsible for the automation team consisting of 22 people allocated in São Paulo, Curitiba and Araraquara;

- Effort estimation of all projects involving automation;
- Preparation and control of the project execution schedule;
- Preparation of reports for monitoring projects;
- Replanning and redistributing time when necessary.
- Definition of strategy;
- Project Quality Control (Documentation, communication and generated artifacts);

Key Achievements:

I took over the leadership of an automation team tasked with executing approximately 7000 automated test cases within two and a half days during the monthly regression cycle. Prior to my involvement, the team had never managed to complete this execution on time, and it was considered impossible. After I joined and led the team for about 4 months, we never missed the deadline again.

Four months after joining, I assumed the management of the test factory in Curitiba, overseeing a team of over 35 people.

AITEC DO BRASIL.

QA Specialist – 12/2015 to 07/2018

- Responsible for planning and execution support;
- Project impact analysis at planning and execution time;
- Responsible for the management and allocation of the team;
- Effort estimation of demands involving Arbor, Siebel 6.3 and Siebel Marketing systems;
- Elaboration and control of the demand execution schedule;
- Preparation of reports to monitor the project;
- Replanning and redistributing the team when necessary.
- Negotiation with the customer;
- Definition of strategies;
- Preparation of Test Plan;
- Development of Test Cases;
- Development of Test Scripts;
- Planning meetings;
- Project Quality Control (Documentation, communication and generated artifacts);
- Participation in grooming meetings;
- Participation in planning meetings;
- Preparation of Test Cases from the meetings;
- Responsible for SAP inventory automation tests in O Boticário;
- Responsible for testing the implementation of CRM – Dynamics.

GLT BRASIL.

Test Manager – 06/2013 to 09/2015

- Responsible for managing the team of 18 people;
- Responsible for project planning;
- Preparation and control of the schedule for project delivery;
- Meetings with customers to survey project needs, as well as to negotiate deadlines and change the scope when necessary.
- Calculation of the effort needed to complete the demands and negotiation of the deadline according to available resources.
- Allocation of resources in different projects according to their priorities.
- Extraction of relevant information from Quality Center for reporting and schedule control.
- Monitoring and control of tests performed, as well as setting priorities.

- Submission of daily management report to Stakeholders.
- Preparation of macros and Excel spreadsheets to streamline the generation of management reports and replanning of dates, scope and effort required to meet deadlines.

Key Achievements:

I took on the leadership of a team of approximately 15 people in a project to migrate all HSBC bank's Savings clients. The project consisted of about 3000 test cases, and each team member could not execute more than 3 tests per day on average. I created a spreadsheet that interacted with ALM through macros, which was responsible for, among other things, releasing all tests that were blocked due to bugs that had already been closed, identifying all tests released by functionality, indicating the bugs that were already cleared for retesting, and which tests would be released if the test passed. In the end, it was possible to increase the number of tests executed per day from 45 to 160.

GVT TELECOMUNICAÇÕES.

Test Manager – 06/2012 to 06/2013

- Responsible for controlling the testing schedule;
- Responsible for managing the team;
- Participation in scrum meetings.
- Control of test execution of stories in sprints.
- Preparation of daily management reports.
- Charge for correction of critical defects
- Analysis, survey and definition of business requirements for the implementation of the Electronic Invoice version 10.0 in GVT for the Central Notes project that involved the areas of Fiscal, Logistics, Billing, Purchasing and Accounting.
- Realization of time and effort estimates for the execution of test work by different teams.
- Negotiation with client areas to release responsible people;
- Inclusion of test scenarios in SAP's SOLMAN tool.
- Monitoring and control of tests performed;
- Setting the priorities of which tests should be performed first.
- Sending a daily report to the stakeholders involved in the project;
- Conducting weekly FUP with managers and directors to pass the status of integrated tests.
- I joined the company as an Assistant Portfolio Manager.

AITEC BRASIL LTDA.

Test Manager – 05/2002 a 09/2008

- Coordination of the test team of the Vivo Prepaid System Unification Project for the SP, RJ/ES, CO/N, BA/SE, Northeast and MG regions.
- Technical leader of the testing team for Vivo's GSM network implementation project: adaptation of the prepaid system to meet the needs of the new technology.
- Analysis, survey and definition of business requirements for new Vivo products (Prepaid plans and services) – CLM (Customer Lifecycle Management) project.
