Professional Objective

The developed projects resulted in intuitive and easily accessible dashboards, allowing clear and precise visualization of essential data for the board's strategic decisions. Liked excel in teamwork, continuous learning, and enjoy helping colleagues. Maintain a positive attitude and am always ready to ask for help when needed.

Education

- **Full Stack Web Development - Trybe**, completed in December 2022.
The program includes over 1,500 hours of lessons covering software development introduction, front-end, back-end, computer science, software engineering, agile methodologies, and soft skills.

- **Studying Software Engineering - AMPLI**, 2022-2026.

The program includes over 3,000 hours of lessons covering software development.

Professional Experience

Full Stack Developer - Rota Transportes Rodoviários LTDA Jul 2023 / Present

Full Stack Developer (focus on backend)

- NodeJs, NestJs,
- ReactJs, NextJs
- PostgreSQL, MongoDB, Oracle

Salesperson - Claro Brasil Jun 2019 / Oct 2020

- Customer service
- New client acquisition

Salesperson - BRF Mar 2013 / Dec 2013

- Sales
- Covered other salespeople during vacations

Key Technologies

- | | |

| ● JavaScript | ● ReactJs |
| ● TypeScript | ● Next |
| ● Node | ● PostgreSQL |
| ● Nest | ● Docker |

Languages

- English - Intermediate/Technical Readinga

Full Stack Developer

Summary of Experience:

Currently, work on developing integrated solutions for data analysis and decision-making support for the board. My main responsibilities include:

- **SQL Query Creation:** Development of complex queries in Oracle database to extract specific data.
- **API Development:** Utilizing NestJS to create robust and efficient APIs, integrating data from multiple sources.
- **Frontend Development:** Building interactive graphical interfaces and dashboards in ReactJS, focusing on usability and data visualization through charts.
- **Data Management:** Migrating and manipulating data in PostgreSQL to allow greater flexibility in analysis and information enrichment.
- **Technologies and Tools:**
 - **Languages and Frameworks:** TypeScript, NestJS, ReactJS.
 - **Testing:** Implementing unit and integration tests using Jest and Vitest.
 - **Documentation:** Creating and maintaining API documentation in Postman.
 - **Automation and Webhooks:** Setting up webhooks and task automation using N8N.

The developed projects resulted in intuitive and easily accessible dashboards, allowing clear and precise visualization of essential data for the board's strategic decisions.

Certificates

Foundations of User Experience (UX) Design

Link: <https://coursera.org/share/e60f2698e6dfaa180b36db86cda8aee4>

Skills developed: User Experience (UX), Wireframe, UX Research, Prototype, User Experience Design (UXD)

Course duration: 20 hours

Bootcamp: Generative AI with AWS

Link: <https://www.betrybe.com/badges/ACE6CD9E5DDB>

Skills developed: Introduction to Generative Artificial Intelligence and introduction to AWS generative AI tools such as CodeWhisper, Bedrock, Amazon Sagemaker, and Amazon Inferentia

Course duration: 10 hours

Time Management Productivity

Link: <https://conqueronline.com.br/certificates/e6ed7c8b-47b8-4f70-9f9c-7f0d703d299e>

Skills developed: Organization, Prioritization, Time management, Focus, Discipline, Communication, Problem-solving, Decision-making, Stress management, Creativity, Proactivity, Self-awareness, Resilience, Adaptability, Teamwork.

Course duration: 15 hours
