---

## Front-End | JavaScript | Vue.js | HTML | CSS | React.js | TypeScript

Front end developer with a strong focus on Vue.js. As a developer, I mastered aspects of Vue.js such as components, directives, templates, and plugins. Core competencies include: •SCRUM •GIT •REST •JIRA •AZURE •CI/CD •Communication •Analytics •Collaboration •Innovation

---

## Achievements

- Conceived and successfully implemented a feature that reduced the time to create entities on the company's internal platform by 14 seconds.
- Improved the intuitiveness of the internal SSO application to meet the criteria of the user's password.
- Implemented the new SSO layout of the internal application making it more intuitive, simple and a more modern look together with the design team.

---

## Professional experience

**ClearSale, Sao Paulo**

**July/2023 - Current**

### SSO Project:

- Implementation of the new layout of the company's internal application, the new SSO;
- Develop and maintain scalable, efficient and easy-to-use web applications;
- Work with agile methodology such as Scrum to facilitate collaboration with the rest of the team;
- Support the continuous improvement of the development processes and improvement of solutions, conducting research activities to identify and propose new methodologies, concepts and trends aligned with the company's goals;
- Provide technical support to systems in production, assisting in the resolution of problems encountered;
- Build reusable components and components to facilitate the development and maintenance of source code;
- Collaborate with the design team to implement intuitive user interfaces and with the backend team to integrate the frontend and backend systems;

**Skills:** Vue.js3 | HTMLCSS | GIT | REST API | SCRUM | Vuetify

### Central Security Project:

- Analyze requirements and develop software solutions based on requests received from the product area, including improvements and corrections.
- Provide technical support to systems in production, assisting in the resolution of problems encountered.
- Participate in code reviews and ensure that the best software engineering practices are applied.

- Work with agile methodology such as Scrum to facilitate collaboration with the rest of the team;

**Skills:** React.js | TypeScript | Zustand | HTML | CSS | GIT | REST API | SCRUM | Material UI

### **Beta Learning (ClearSale), São Carlos - SP**

**Sep/2022 - Jul/2023**

- Develop Front end solutions of new features;
- Monitor the performance of the application and implement improvements in the functionalities;
- Work with development using agile methods;
- Collaborate with the design team to implement intuitive user interfaces and with the backend team to integrate the frontend and backend systems;
- Help solve complex problems and suggest improvements;

**Skills:** Javascript Vanilla | CSS | HTML | SCRUM | GIT | REST API

### **TooDoo**

**FEB/2022 - MAY/2022**

- Implement efficient and scalable solutions, ensuring code quality and performance excellence with the Vue.js framework;
- Create reusable code and web components for future use;
- Ensure unit and automated tests;
- Guide and help the team's developers, sharing knowledge and best practices;
- Document and help create best practice standards for frontend development;
- Ensure the construction and evolution of the Design System together with Product Design;

**Skills:** Vue.js | HTML | CSS | GIT | JEST | KANBAN | AZURE

### **Riversoft Software Integration & Development Feb 2022**

**Nov/2020 -**

- Interface development of new applications;
- Development of new product features focused on interface;
- Maintenance and evolution of existing application interface;
- Flexible and open to change (processes, team, code);
