PROFESSIONAL SUMMARY

Motivated and detail-oriented computer science student with a passion for mobile development and innovative technologies. Skilled in Android development and Firebase, with hands-on experience in Kotlin and Python. Continuously driven to expand my technical knowledge and apply it in real-world scenarios.

Founder of Imetro Dev Club (IDC), a community at Universidade Metropolitana de Angola with the aim of bringing together people with an interest in technology and together learn through practical projects, workshops, etc.

Actively seeking an internship position to leverage my skills and passion for technology, while contributing to innovative projects and gaining practical experience in the industry.

TECHNICAL SKILLS AND TOOLS

Technical Skills:

Kotlin, Python, Retrofit, Jetpack Compose, Room, Datastore, Work Manager, Dagger-Hilt, Database, Coroutines, Algorithm & Data Structure.

Tools/Platforms:

Git, GitHub, Android Studio, IntelliJ, Leetcode.

EDUCATION

Universidade Metropolitana de Angola – IMETRO
http://www.imetroangola.com/

Student of IMETRO, pursuing Computer Science degree – 2nd year

SOFT SKILLS

- Quick learning/Adaptability

- Problem solving

- Strong verbal and written communication skills.

- Ability to work with distributed teams.

PERSONAL PROJECTS

Nuntium News App
- Using free api developed this app to apply the knowledge I got from Google Basics with Compose course.
- The app allows the user to save news for offline reading.
- The app uses MVVM architecture.

Movie Listing App
- Developed this offline first app that allow user to see upcoming, now playing and popular movies.
- Users can use this app to stay updated with the latest movies and maybe go to the cinema to watch them.
- Built with MVVM architecture and Modern Android Development (MAD) practices.
