SUMMARY

- I have over 5 years of experience as a Software Engineer specializing in Front-End development. I am adept at incorporating user and business requirements into cost-effective, secure, and user-friendly solutions that are scalable and durable. Additionally, I am passionate about building scalable software solutions and resilient system architectures.

SKILLS

TypeScript, React, Next.js, Node, NPM, Redux, Context API, Chakra UI, Styled Components, JavaScript ES6, Husky, Jest, Cypress, React Testing Library, PostgreSQL, MongoDB, Java, Spring Boot, Maven, Postman, Azure Devops, Docker, GraphQL, Vercel, Github Actions, React Native, Expo, Figma and more.

WORK EXPERIENCE

[Sodexo Global](#) (Contractor via Objective)   **Remote**
Lead Front-End Developer   *Nov 2022 - Present*
- Working as a Frontend Leader on a backoffice project and being responsible for other developers, also working together with the UX Design team and the Product team.
- Helping the Backend team to create, fix and maintain many microservices for credit management.
- Implementation and scalability of a front end project with internationalization for some countries.
- Refactoring existing code, improving readability and removing duplicates.
- Creating and maintaining multiple microservices.
- Helping the UX Design team with technical validations for new features.
- Helping the Product team with business rules, Jira and task delegation.
- Tools Frontend: TypeScript, React, Jest, Cypress, Chakra UI & Context API.
- Tools Backend: Java, Spring Boot, JPA, Maven, PostgreSQL, Redis & Azure DevOps.

[Objective](#)   **Remote**
Front-End Engineer   *Abr 2022 - Nov 2022*
- Working as a frontend developer creating modern and responsive websites and systems, and implementing full-cycle new features involving the frontend part and the backend part of the product.
- Implemented and maintained boilerplate for different projects.
- Using Jest and Cypress to create large-scale, automated tests.
- Reinforce code standards - set up linter, formatter and git hooks.
- Implement shared complex form validations using React Hook Form and Yup.
- Tools: TypeScript, React, Next.js, Jest, Styled Components, Hooks, Redux & Context API

[Freelancer](#)   **Remote**
Software Engineer   *May 2018 - Abr 2022*
- Working as a freelancer, I create and maintain websites and systems with more than 50k accesses and internal projects for internal management of electronic products.
- Using Next.js and Styled components to create the frontend of the applications, and using PHP 7 and MySQL to implement a robust backend, and hosting both on Hostinger servers.

EDUCATION

University of Digital Work   **Brazil**
Computer Systems and People Management on Organizational Leadership   *Graduation Date: Nov 2017*
