Application Developer | Web Developer | Java | NestJS | Angular | MySQL | Automated Tests | CML | BRM | PHP | HTML | JavaScript | System Integration

Skills Summary

✓ Web Platform Creation: Experienced in building web platforms using NestJS, Angular, and MySQL. Skilled in data analysis and providing comprehensive support throughout project lifecycles.
✓ Automated Testing: Developed and maintained automated tests in Java to ensure application quality and functionality.
✓ Custom Platform Support: Provided support for unique platforms using CML, focusing on process optimization and technical issue resolution.
✓ Tax Updates and Invoicing: Managed fiscal updates and generated invoices using the BRM framework with C, ensuring compliance with regulatory requirements.
✓ Intranet and Internal Dashboards: Created internal communication tools and dashboards using PHP, HTML, MySQL, and JavaScript to enhance organizational management.
✓ System Integration and Optimization: Collaborated with IT teams and other departments to implement new features and continuous improvements.

Academic Education

✓ Bachelor's Degree in Computer Engineering | UNASP-Hortolândia (2024)
✓ Technical Degree in Informatics | ETEC SP (2017)

Technologies

✓ HTML | Javascript | Java | PHP | CSS | MySQL | Git | GitHub | NodeJS

Trajetória Profissional

IBM
Developer | 07/2021 – Present
- Worked on the AT&T project, developing Mainframe applications using Java and COBOL.
- Created a web platform with NestJS, Angular, and MySQL for customer data analysis, gaining significant visibility as the sole developer supporting the application at the project's end.
- Participated in the eConfig project (August 2022 to May 2024), focusing on automated testing in Java.
- Provided support and development for the platform using IBM's exclusive CML language.
- Involved in the Oi project (May 2024 to present), supporting fiscal updates for Oi accounts using the BRM framework with C, specifically focusing on invoice generation for clients.

Greenbrier Maxion
Web Development Intern | 02/2020 – 07/2021
- Responsible for developing the company's intranet using PHP, HTML, MySQL, and JavaScript.
- Created internal dashboards to support various departments within the company.
- Developed and maintained an internal ticketing platform with a focus on JavaScript.
- Collaborated with IT teams for system integration and process optimization.
- Participated in strategic meetings to gather requirements and implement new features.

GLOBAL HITSS
Backoffice Assistant | 09/2019 – 02/2020
- Analyzed documents for data validation in Claro's business sales.
- Reviewed and corrected data inconsistencies to ensure accurate processed information.
- Collaborated with sales teams to ensure document compliance.
- Generated detailed reports on data validation.
- Utilized internal systems for process tracking and control.
