## PROFESSIONAL EXPERIENCE

**Company:** Brazilian Army
**Period**: 03/2016 – 01/2017
**Position:** Soldier
**Activities:** Maintain hierarchy, discipline, respect, commitment, and other responsibilities in daily life.

**Company:** DBC COMPANY
**Period**: 07/2019 – 09/2019
**Position:** Intern (Training Program)
**Activities:** With the accelerator format the VemSerDBC training program students leave with the Full Stack format where it is worked: ReactJS, JavaScript, HTML, CSS, Spring boot, Docker, Java EE, Java O.O., agile methodology.

**Company:** DBC COMPANY
**Period**: 09/2019 – 01/2020
**Position:** Software Developer (backend)
**Activities:** Backend development with Java + Spring, JUnit, Mockito, Swagger, Jenkins, Linux, Kubernetes. Little contact with the front end, React + Redux.

**Company:** Mout's - Soluções em Tecnologias
**Period**: 11/2020 – 12/2021
**Position:** Full Stack Engineer
**Activities:** In the beginning I was based at Philips, working Backend development with Java and SQL. On the front, Tasy (Angular) framework.
In July, I started working with Spring, Angular and MongoDB.

**Company:** Zenvia
**Period**: 01/2022 – Present
**Position:** Full Stack Engineer
**Activities:** I worked at Zenvia Labs, a team dedicated to innovating and developing new products with a focus on communication. As the team is small, it is necessary to have knowledge of various types of technologies and future trends.

In November 2022, I was transferred to the Zenvia Bots project, where I worked with Angular, Spring and Node. The tool allows the creation of automated flows (via API or not) and integration with various communication channels.

In April 2023, I was transferred to work in the Whatsapp squad, where all new features, support and maintenance were the responsibility of the project in question. Using Angular, Node and other infrastructure tools like Jenkins and Kubernetes.
