Portuguese

PROFILE

I am a person who has a great **abiliy to adapt and learn**. I love to talk about technologies, languages and all the cool subjects that makes me excited. But when it comes to working effectively, I believe that it goes **beyond just black screens**. I have a passion for understanding the business, solving problems, creating value and delivering results.

WORK EXPERIENCE

Full-Stack Software Engineer - *Remote*
at Influencer - **London / International**   April 2023 - present

A **leading marketing agency** allied with **TikTok, Meta**, and **YouTube**, where I play a **pivotal role** in developing and maintaining the **company's core platforms**. Leveraging my expertise in **both front end and back-end technologies**, I have contributed to the design and implementation of scalable solutions that enhance the the main company's capabilities.

TypeScript	ReactJS	GraphQL	Apollo	NodeJS	PostgreSQL	Postman	React Native
DBeaver	AWS	Microservices	CI/CD	Unit Tests	Git		

Principal Software Engineer - *Remote*
at NPAW - **Barcelona / International**   April 2023 - June 2023

During my consultancy there, a **big data video intelligence firm** that handles over **2 trillion events per day**, I served as a direct point of contact with the **C-level** leadership. In the **JavaScript** ecosystem, I engineered a dynamic widget solution to enhance analytics capabilities and seamlessly integrated with NPAW's exposed API. I also designed a recommendation engine to bolster the product-analytics suite.

JavaScript	ReactJS	REST API	Java	Python	PostgreSQL	Insomnia	SQLite
AWS	CI/CD	Git					

Tech Lead - *Remote*
at Amyris Inc. - **United States / Brazil / UK / Portugal**   March 2022 - April 2023

As a tech lead for Biossance, a the **biggest brand** inside Amyris world (*50M$/year revenue and 1M users monthly*), I was responsible for developing and delivering innovative solutions, for stores in the USA, Brazil, and Europe. I also **oversee the headless commerce** project that aims to **replace 34 legacy stores with one smart and robust ecommerce platform**. I have also successfully developed a website for a Nasdaq event in New York.

TypeScript	Hydrogen	NextJS	GraphQL	AWS	Liquid	Gatsby	Git
Python							

Software Architect - *Hybrid*
at Gaspard+Bruno/Farfetch - **London / International**   May 2020 - February 2022

I've worked on some large-scale applications for Farfetch, a leading global platform for the luxury fashion industry. The main application supported seven different brands, such as Harrods, Browns, and Thom Browne, in the same system. I have used React Native as the main technology to develop user interfaces and components with complex hooks and redux management. Also, I did side projects.

JavaScript	ReactJS	React Native	Ruby	Python	PostgreSQL	Git

COVER LETTER

TO WHOM IT MAY CONCERN,

I am writing to express **my interest in contributing my extensive expertise in software engineering** and leadership to your esteemed organization. As a **senior-level software engineer**, I am dedicated to tackling **complex challenges**, guiding **high-performing teams**, and delivering **innovative software solutions** that drive **organizational success**.

My experience spans multiple countries, including the United States, Thailand, Switzerland, UK, Brazil and many more, providing me with a **deep understanding of cultural nuances and international market challenges**. This **global perspective** enables me to operate across various sectors such as agriculture, biotechnology, international trade, health insurances, big data, luxury fashion retail, among others.

One of my **proudest achievements is founding PAD Tech**, a software house that offers high-quality freelance services to diverse industries. This venture **showcases my skills in software development** and my ability to **create value in a favorable business environment**.

I excel in both **technical development and strategic leadership**, taking on challenging projects to create advanced solutions. My **strong analytical** and **business intuition skills** allow me to identify growth opportunities and **implement high-impact software solutions** consistently. I am committed to delivering results with utmost **efficiency**, **transparency**, and **accountability**, always aligned with the goals and objectives of the organization.

I adopt a **professional**, **transparent**, and **responsible approach** in all my interactions and believe in building **authentic connections** that go beyond technical conversations. Through my technical expertise, leadership skills, and business acumen, **I aim to empower organizations to reach new heights of success**.

Thank you for considering my application. I look forward to the opportunity for an interview to discuss how I can contribute to the continued success of your organization.

SINCERELY,

Lucas Padilha
