Summary

I'm a Software Engineer with 6 years experience. My technical expertise includes: Javascript, Typescript, React, React Native, Node, Swift, CI/CD pipelines, Android and iOS.

I like to contribute with my experience in mentoring early career engineers and writing clean and maintainable code. I have experience in leading projects from scratch and working in features that involves native development using Swift and Java.

I am excited to contribute to projects where I can apply my skills to create impactful solutions. Let's connect and explore how we can collaborate to achieve great results.

Experience

/tw Software Engineer

Thoughtworks

Dec 2021 - Present (2 years 7 months)
• Worked as a consultant for international clients, specializing in React Native, React.js, Node.js, JavaScript, Typescript, Firebase, Swift, Objective-C, Kotlin, Java and other technologies.
• Led the mobile apps CI/CD pipelines to App Store and Play Store deployments using specially Bitrise, Fastlane and Expo EAS.
• Mentored early-career engineers, resulting in a successful promotion of an intern to junior engineer in a short period of time.
• Demonstrated technical expertise and received positive feedback from clients and the Thoughtworks team.
• Contributed to the development of high-quality applications.
• Implemented prototypes, practices and concepts such as MVP, code reviews, pair programming, TDD and feature toggles for rolling out features to production.
• Implemented tests using Jest, Detox, React Testing Library and Cypress.
• Demonstrated expertise in various aspects of software development, including front-end development with React.js, iOS and Android development with React Native and back-end with Node.js.
• Improved App reviews in the store from 2.8 to 4.5 stars.

Mobile Software Engineer

Accountfy

Oct 2020 - Dec 2021 (1 year 3 months)
Accountfy it's a B2B SaaS company that offers accountability services, in this company I've:
• Led the mobile development team in app architecture planning, deployment, and maintenance.
• Collaborated with product and design teams to ensure successful full-cycle app development.

• Implemented Test-Driven Development (TDD) practices to improve the quality and efficiency of the project.
• Deployed mobile applications to app stores, including the App Store and Google Play, using Fastlane, Bitrise.
• Implemented a mobile CI/CD pipeline that reduced release time by 30%.
• Contributed to the development and launch of high-quality mobile applications, using React Native, Javascript, Typescript, Jest, Detox, Swift, and Java.
• Demonstrated expertise in mobile application development for iOS and Android using React Native.

Full Stack Engineer

React-it Solutions

Jun 2019 - Oct 2020 (1 year 5 months)
• Collaborated on multiple projects, using React Native, React.js, Node.js, Javascript, and Swift.
• Testing the developed applications with end-to-end testing and unity testing, using specially Detox and Jest for that.
• Contributed to the deployment of high quality applications to the App stores and participated in the planning of new features for the projects with the design team.

Software Tester - Intern

Sicoob

Jan 2019 - Jun 2019 (6 months)

Freelancer developer

Freelance

Sep 2018 - Dec 2018 (4 months)
