Highly motivated and experienced Front-End Developer, with over 5 years of experience building and maintaining mobile and web applications. Professional proven to be able to lead teams, manage projects and deliver solutions on time and within budget. Has a strong understanding of software development principles and best practices. Passionate about creating engaging and easy-to-use mobile and web experiences.

2022 - now (current position) - Tula skincare - Frontend developer
- Part of the team that successfully migrated the entire e-commerce platform from Shopify's Liquid theme to the Shogun CMS platform using React, streamlining content management and improving efficiency.
- Helping the redesign and on a second migration of Tula's e-commerce platform from Shogun to a modern React-based, Remix and NextJS framework (Hydrogen), within the Shopify ecosystem, significantly enhancing user experience and scalability.
- Developed a cost-saving in-house generic quiz solution for various purposes, eliminating dependence on third-party vendors.
- Built localized versions of the e-commerce platform for the Canadian and United Kingdom markets, ensuring a seamless user experience for international customers.
- Managed ongoing e-commerce operations, including product addition/updates, inventory management, and discount creation on the Shopify platform.

2020 / 2022 - DevGrid - Mobile developer
- Led the development and maintenance of Voltaware's mobile app built with React Native, enabling users to monitor energy consumption through intuitive charts and graphs.
- Successfully replicated the app of the Voltaware app for two additional companies, adhering to their specific branding guidelines.
- Spearheaded the creation of a brand-new React Native application from scratch, fostering strong team collaboration.
- Implemented continuous integration/continuous delivery (CI/CD) using Bitrise for all projects, streamlining the development workflow and enhancing QA testing processes.
- Managed the deployment process for all developed mobile applications on Google Play and the Apple App Store, ensuring timely and successful launches.

2018 / 2020 - AM4 - Mobile developer
- Delivered exceptional mobile and web experiences by implementing UX/UI improvements, upgrades, bug fixes, and new features across diverse projects built with React Native, Ionic, PhoneGap, ReactJS, and Angular.
- Streamlined existing applications by rewriting code and releasing optimized versions for improved performance and user satisfaction.
- Demonstrated proficiency in building mobile apps from the ground up using React Native, ensuring a robust and user-friendly foundation
